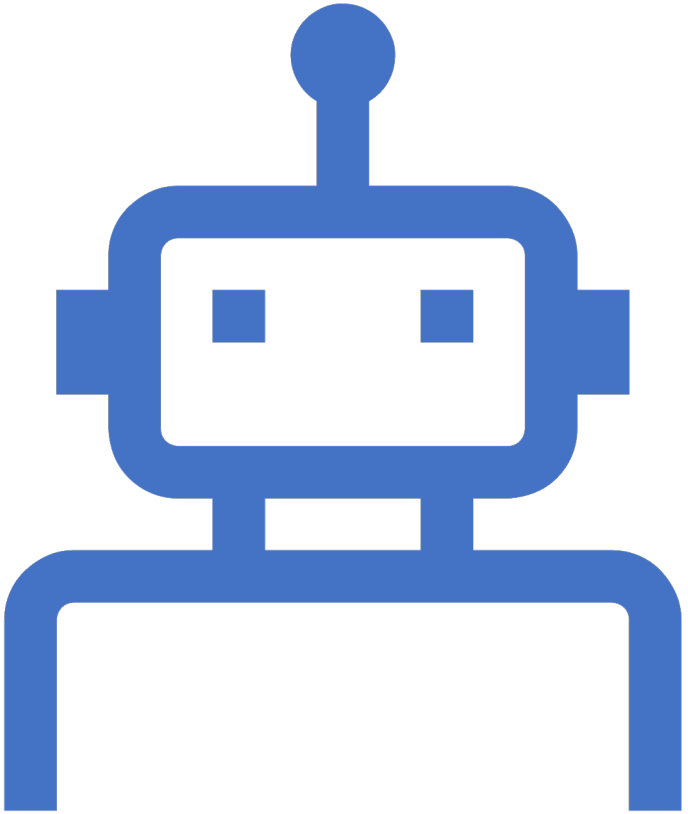
- Cloud Strategy
- Data and AI
- Software Development
- User Experience
- Product Management
- Idea Validation

kainos®

Who we have helped

- Aflow
- Exapt
- TapSOS
- Linc
- Defensive Thinking



My founder journey

At Kainos our Redact product Helps officer’s in, particular ones who are new to the force with preparing files for the CPS. Redact Reduces the amount of time/effort it takes them to do this along with the risk of disclosing evidence. Redact does this by using automation to suggest what PII information to redact within evidence documents with officers remaining in complete control of what is actually redacted.
